### PREINSTALLATION CHECKS

- Ensure that you have a reliable cable internet connection for the Smart IP Camera to work at its best. Portable Internet connections based on Hot spots or a Wi-Fi Dongle will not provide the best and consistent results.
- Your experience with Smart IP Camera will vary based on the quality of your router.

### INSTALLATION

- For indoor installation there is magnetic strip on the backside of the IP cam, connect it to any metal surface. Also, there is a screw plate which can be connected to any surface where you want to install your IP cam
- For outdoor installation on the back side of IP cam there is a small hole which can be screwed with outdoor wall
- You can open the top part of the IP cam using a button. Once you flip it you will have 5v USB charging port & micro SD slot.

### APP SET UP & CONFIGURATION

- Download and Install the "Hogar" app on your device
- Power the Smart IP Camera using a 5V adapter.
- Press the power button on the rear to turn ON the device.
- Open the Hogar SE application and register for an account if you are a new user.
- Login into the Hogar application and select Room from the dashboard and then + icon on the right top of the screen.
- Select security-->Smart IP Camera-->Select the option and continue to the next step
- Enter the Wifi Credentials of the Wi-Fi network to connect and select next.
- Point the Smart IP Camera to the application screen to scan the displayed QR Code.
- Smart IP Camera makes a prompt sound indicating a successful configuration.
- Rename the device and add it to the room.
- Select the Smart IP Camera to stream live video.
